

Gamlen®  
GamPette™

# GamPette™ Precision Powder Pipette

Hand Held Manual Powder  
Dispensing System

The GamPette™ is a hand held powder pipette that accurately dispenses solids. It comprises of a dispensing handle and a controller unit. Tip sizes are available to accommodate a wide range of powder volumes. Powder is drawn into the pipette tip in the handle under vacuum, and then expelled under light positive pressure.

Instruments  
*Helping you make better tablets™*

## Precise and Reproducible

GamPette™ is precise and reproducible with precision being maintained by the removal of the excess powder from the bottom of the tip after aspiration (50mg +/- 2mg; 150mg +/- 1mg; 1000mg +/- 2.5mg)

## No Cross Contamination

A rapidly exchangeable, low cost, cellulose filter is incorporated in the delivery line of the pipette, to avoid any risk of cross contamination.

## Lightweight

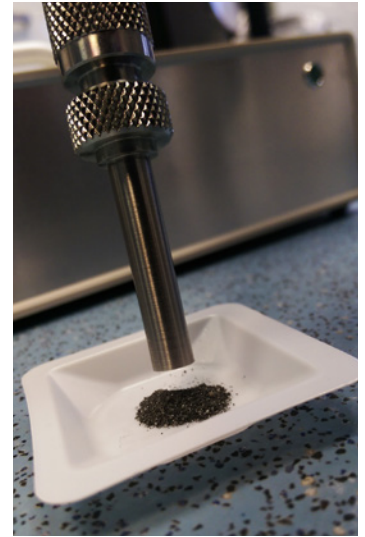

The ergonomically designed hand piece allows easy and fatigue free filling of vessels. The hand piece is run from a compact control unit connected via a flexible vacuum pipe.

## Manually Adjustable

Multiple handle sizes can be used with a single GamPette™ controller unit to cover a wide dispense weight range, providing an economic, versatile powder dispensing system for your laboratory. Custom designed GamPette™ nozzles can also be supplied to order.

## Simple

The pipette is simply operated via a three-position switch (fill - off - dispense) on the hand piece.

---

## Gamlen® GamPette™ HC High Capacity **NOW AVAILABLE!**

Capable of dispensing powder samples up to 25g quickly and accurately.
