CAPSULE POLISHER MODEL GPCP-350-WD

GlobePharma's Model GPCP-350-WD is a versatile polisher, which can be used for both capsule polishing and tablet de-dusting. It has a rotating brush with built-in GMP features that facilitate use, cleaning and maintenance. It can be washed down with water.

FEATURES:

- All product contact parts are made of stainless steel
- Rate of output of 200,000 plus capsules per hour
- Variable speed operation
- Snap and lift assembly and disassembly
- Sealed ball bearings
- Seamless Nylon polishing net which slides easily inside the perforated tube
- Compressed air is provided along the entire length of the finishing chamber
- Coil Spring, positioned inside the chamber ensures continuous, forward movement of heavy and large product
- All replacement parts including brush, net, and shaft can be replaced individually without need to replace the whole assembly
- Easy cleaning and maintenance
- All the electrical, pneumatic and the replacement parts are US made.
- Can be washed down with water.
